| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This Human Hypoxia Inducible Factor 2 Alpha (HIF2a) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological f... |
| Detektionsbereich        | 0.156-10ng/mL                                                                                                                                                                                                                                                 |
| Sensitivitaet            | 0.053ng/mL                                                                                                                                                                                                                                                    |
| NCBI                     | <a href="#">8843</a>                                                                                                                                                                                                                                          |
| UniProt                  | <a href="#">P49019</a>                                                                                                                                                                                                                                        |
| Proben                   | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                        |
| Target-Kategorie         | Human Hypoxia Inducible Factor 2 Alpha (HIF2a)                                                                                                                                                                                                                |

Anwendungsbeschreibung

Assay Length: 3 hours. Experimental Method: Sandwich
