| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Rat                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | This Rat Islet Amyloid Polypeptide (IAPP) ELISA Kit is a precoated, Competitive Inhibition ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biologic... |
| Detektionsbereich        | 7.81-500pg/mL                                                                                                                                                                                                                                                 |
| Sensitivitaet            | 2.19pg/mL                                                                                                                                                                                                                                                     |
| NCBI                     | <a href="#">294673</a>                                                                                                                                                                                                                                        |
| UniProt                  | <a href="#">Q6AXR4</a>                                                                                                                                                                                                                                        |
| Proben                   | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                        |
| Target-Kategorie         | Rat Islet Amyloid Polypeptide (IAPP)                                                                                                                                                                                                                          |

Anwendungsbeschreibung

Assay Length: 3 hours. Experimental Method: Competitive Inhibition
