| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This Human Interleukin 1 Epsilon (IL1e) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids . This... |
| Detektionsbereich        | 15.6-1000pg/mL                                                                                                                                                                                                                                                |
| Sensitivitaet            | 5.1pg/mL                                                                                                                                                                                                                                                      |
| NCBI                     | <a href="#">3479</a>                                                                                                                                                                                                                                          |
| UniProt                  | <a href="#">P05019</a>                                                                                                                                                                                                                                        |
| Proben                   | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                        |
| Target-Kategorie         | Human Interleukin 1 Epsilon (IL1e)                                                                                                                                                                                                                            |

Anwendungsbeschreibung

Assay Length: 3 hours. Experimental Method: Sandwich
