| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This Human Mesencephalic Astrocyte Derived Neurotrophic Factor (MANF) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and ... |
| Detektionsbereich        | 15.6-1000pg/mL                                                                                                                                                                                                                                                |
| Sensitivitaet            | 6.7pg/mL                                                                                                                                                                                                                                                      |
| NCBI                     | <a href="#">24536</a>                                                                                                                                                                                                                                         |
| UniProt                  | <a href="#">Q62959</a>                                                                                                                                                                                                                                        |
| Proben                   | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                        |

|                        |                                                                  |
|------------------------|------------------------------------------------------------------|
| Target-Kategorie       | Human Mesencephalic Astrocyte Derived Neurotrophic Factor (MANF) |
| Anwendungsbeschreibung | Assay Length: 3 hours. Experimental Method: Sandwich             |
