| Spezies Reaktivität      | Rat                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | This Rat N-Terminal Pro Brain Natriuretic Peptide (NT-ProBNP) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other bi... |
| Detektionsbereich        | 78.1-5000pg/mL                                                                                                                                                                                                                                                |
| Sensitivitaet            | 27pg/mL                                                                                                                                                                                                                                                       |
| NCBI                     | <a href="#">216799</a>                                                                                                                                                                                                                                        |
| UniProt                  | <a href="#">Q8R4B8</a>                                                                                                                                                                                                                                        |
| Proben                   | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                        |
| Target-Kategorie         | Rat N-Terminal Pro Brain Natriuretic Peptide (NT-ProBNP)                                                                                                                                                                                                      |

Anwendungsbeschreibung

Assay Length: 3 hours. Experimental Method: Sandwich
