| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Equine                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | This Equine Transforming Growth Factor Beta 1 (TGFb1) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, platelet-poor plasma, tissue homogenates, cell culture supernatants and other biological... |
| Detektionsbereich        | 15.625-1000pg/mL                                                                                                                                                                                                                                              |
| Sensitivitaet            | 6.3pg/mL                                                                                                                                                                                                                                                      |
| NCBI                     | <a href="#">8737</a>                                                                                                                                                                                                                                          |
| UniProt                  | <a href="#">Q13546</a>                                                                                                                                                                                                                                        |
| Proben                   | serum, platelet-poor plasma, tissue homogenates, cell culture supernatants and other biological fluids                                                                                                                                                        |
| Target-Kategorie         | Equine Transforming Growth Factor Beta 1 (TGFb1)                                                                                                                                                                                                              |

Anwendungsbeschreibung

Assay Length: 4.5 hours. Experimental Method: Sandwich
