| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                    |
| Applikation              | ELISA                                                                                                                                                                                                                                                          |
| Spezies Reaktivität      | Gallus                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This Chicken Vasoactive Intestinal Peptide (VIP) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluid... |
| Detektionsbereich        | 7.812-500pg/mL                                                                                                                                                                                                                                                 |
| Sensitivitaet            | 1.8pg/mL                                                                                                                                                                                                                                                       |
| NCBI                     | <a href="#">7064</a>                                                                                                                                                                                                                                           |
| UniProt                  | <a href="#">P52888</a>                                                                                                                                                                                                                                         |
| Proben                   | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                         |
| Target-Kategorie         | Chicken Vasoactive Intestinal Peptide (VIP)                                                                                                                                                                                                                    |

Anwendungsbeschreibung

Assay Length: 4.5 hours. Experimental Method: Sandwich
