| Applikation              | IHC-P, WB                                                                                                                                                                                                                                                     |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Synthetic peptide within Human Lipoprotein a aa 150-250.                                                                                                                                                                                                      |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | Lp(a) is assembled at the hepatocyte cell membrane surface, which is similar to typical LDL particles. However, there are other possible locations of assembly. The particles mainly exist in plasma. Lp(a) contributes to the process of atherogenesis. T... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/mL.                                                                                                                                                                                                                                                      |
| Klon-Bezeichnung         | [JE39-47]                                                                                                                                                                                                                                                     |
| Molekulargewicht         | Predicted band size: 227 kDa                                                                                                                                                                                                                                  |

|                        |                                                                           |
