| Immunogen                | Recombinant protein within human LMO4 aa 1-165.                                                                                                                                                                                                               |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | LIM domain transcription factor LMO4 is a protein that in humans is encoded by the LMO4 gene. LIM domain only 4 is a cysteine-rich, two LIM domain-containing protein that may play a role as a transcriptional regulator or possibly an oncogene. Its mRN... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/mL.                                                                                                                                                                                                                                                      |
| Klon-Bezeichnung         | [JE39-65]                                                                                                                                                                                                                                                     |
| Molekulargewicht         | Predicted band size: 18 kDa                                                                                                                                                                                                                                   |
