| Produktbeschreibung      | Folate receptor 1 (Folate receptor alpha, FOLR1) is a protein that in humans is encoded by the FOLR1 gene. The protein encoded by this gene is a member of the folate receptor (FOLR) family. Members of this family have a high affinity for folic acid a... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/mL.                                                                                                                                                                                                                                                      |
| Klon-Bezeichnung         | [PSH06-93]                                                                                                                                                                                                                                                    |
