| Produktbeschreibung      | Integrin beta-3 (beta3) or CD61 is a protein that in humans is encoded by the ITGB3 gene. CD61 is a cluster of differentiation found on thrombocytes. The ITGB3 protein product is the integrin beta chain beta 3. Integrins are integral cell-surface pro... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/mL.                                                                                                                                                                                                                                                      |
| Klon-Bezeichnung         | [PSH09-27]                                                                                                                                                                                                                                                    |

|                        |                                                                              |
|------------------------|------------------------------------------------------------------------------|
| Molekulargewicht       | Predicted band size: 87 kDa                                                  |
| UniProt                | <a href="#">P05106</a>                                                       |
| Puffer                 | PBS (pH7.4), 0.1% BSA, 40% Glycerol. Preservative: 0.05% Sodium Azide.       |
| Reinheit               | Protein A affinity purified.                                                 |
| Formulierung           | Liquid                                                                       |
| Target-Kategorie       | Integrin beta-3 Platelet membrane glycoprotein IIIa (GPIIIa) CD61 ITGB3 GP3A |
