| Artikelname              | HRP, Goat Anti-Guinea pig IgG, Polyclonal                                                            |
| Artikelnummer            | ASC-A21070                                                                                           |
| Hersteller Artikelnummer | A21070                                                                                               |
| Alternativnummer         | ASC-A21070-100,ASC-A21070-500                                                                        |
| Hersteller               | Abbkine Scientific                                                                                   |
| Wirt                     | Goat                                                                                                 |
| Kategorie                | Antikörper                                                                                           |
| Applikation              | ELISA, IHC-P, WB                                                                                     |
| Spezies Reaktivität      | Guinea pig                                                                                           |
| Immunogen                | Guinea pig IgG whole molecule                                                                        |
| Konjugation              | HRP                                                                                                  |
| Produktbeschreibung      | HRP conjugated Goat Anti-Guinea pig IgG (H+L) secondary antibody...                                  |
| Klonalität               | Polyclonal                                                                                           |
| Tag                      | Goat Anti-Guinea pig IgG                                                                             |
| Puffer                   | Liquid in PBS, pH 7.4, containing 1% BSA as stablizer and 50% Glycerol.                              |
| Reinheit                 | Affinity purified using solid phase guinea pig IgG (H&L) with finally > 95% purity based on SDS-PAGE |

|                        |                                                                                                                                                                                                       |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Formulierung           | Liquid solution                                                                                                                                                                                       |
| Anwendungsbeschreibung | Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: WB (1:10000-1:100000), IHC-P (1:500-1:2000), ELISA (1:5000-1:100000). |
