| Artikelname              | DyLight 405, Goat Anti-Mouse IgG                                                                            |
| Artikelnummer            | ASC-A23110                                                                                                  |
| Hersteller Artikelnummer | A23110                                                                                                      |
| Alternativnummer         | ASC-A23110-100, ASC-A23110-500                                                                              |
| Hersteller               | Abbkine Scientific                                                                                          |
| Wirt                     | Goat                                                                                                        |
| Kategorie                | Antikörper                                                                                                  |
| Applikation              | FC, ICC, IF                                                                                                 |
| Spezies Reaktivität      | Mouse                                                                                                       |
| Immunogen                | Mouse IgG whole molecule                                                                                    |
| Konjugation              | DyLight 405                                                                                                 |
| Produktbeschreibung      | DyLight 405 conjugated Goat Anti-Mouse IgG (H+L) secondary antibody...                                      |
| Tag                      | Goat Anti-Mouse IgG                                                                                         |
| Puffer                   | Liquid in PBS, pH 7.4, containing 0.02% Sodium Azide as preservative, 1% BSA as stablizer and 50% Glycerol. |
| Reinheit                 | Affinity purified using solid phase Mouse IgG (H&L) with finally > 95% purity based on SDS-PAGE             |
| Formulierung             | Liquid solution                                                                                             |

|                        |                                                                                                                                                                |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | Optimal working dilutions should be determined experimentally by the investigator. Suggested starting 1:50-1:1000 dilutions for most fluorescent applications. |
