| Applikation              | FC, ICC, IF                                                                                                 |
| Spezies Reaktivität      | Goat                                                                                                        |
| Immunogen                | Goat IgG whole molecule                                                                                     |
| Produktbeschreibung      | IFKine(TM) Red Donkey Anti-Goat IgG (H+L) secondary antibody...                                             |
| Tag                      | Donkey Anti-Goat IgG                                                                                        |
| Puffer                   | Liquid in PBS, pH 7.4, containing 0.02% Sodium Azide as preservative, 1% BSA as stablizer and 50% Glycerol. |
| Reinheit                 | Affinity purified using solid phase Rabbit IgG (H&L) with finally > 95% purity based on SDS-PAGE            |
| Formulierung             | Liquid solution                                                                                             |

Anwendungsbeschreibung

Optimal working dilutions should be determined experimentally by the investigator. Suggested starting 1:50-1:1000 dilutions for most fluorescent applications.
