| Alternativnummer         | ASC-KTA4002-50, ASC-KTA4002-100                                                                                                                                                                                                                                |
| Hersteller               | Abbkine Scientific                                                                                                                                                                                                                                             |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                    |
| Produktbeschreibung      | Mitochondrial Permeability Transition Pore Assay Kit s a more direct detection method for detecting the opening of MPTP than only based on mitochondrial membrane potential analysis...                                                                        |
| Tag                      | Mitochondrial Permeability Transition                                                                                                                                                                                                                          |
| Anwendungsbeschreibung   | Mitochondrial Permeability Transition Pore Assay Kit is a more direct detection method for detecting the opening of MPTP than only based on mitochondrial membrane potential analysis. The principle is: Firstly, loading Calcein AM through passive transport |
