| Hersteller               | Abbkine Scientific                                                                                                          |
| Kategorie                | Proteine/Peptide                                                                                                            |
| Produktbeschreibung      | Human GM-CSF protein (Animal-Free), expressed in HEK293 Cells...                                                            |
| Molekulargewicht         | 14.5 kDa                                                                                                                    |
| Tag                      | GM-CSF                                                                                                                      |
| NCBI                     | <a href="#">1437</a>                                                                                                        |
| UniProt                  | <a href="#">P04141</a>                                                                                                      |
| Reinheit                 | > 98 % as determined by SDS-PAGE                                                                                            |
| Formulierung             | Lyophilized from sterile PBS, pH 7.4.                                                                                       |
| Sequenz                  | Amino acid sequence derived from human GM-CSF (NP_000749.2) (Met1-Glu144) was expressed with a 6*His tag at the C-terminus. |
| Anwendungsbeschreibung   | Human                                                                                                                       |
