| Produktbeschreibung      | The molecular machinery of autophagy was largely discovered in yeast and referred to as autophagy-related (Atg) genes. Formation of the autophagosome involves a ubiquitin-like conjugation system in which Atg12 is covalently bound to Atg5 and targeted... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
