| Produktbeschreibung      | This gene encodes a GTPase-activating protein (GAP). A variety of cellular processes are regulated by Rho GTPases which cycle between an inactive form bound to GDP and an active form bound to GTP. This cycling between inactive and active forms is reg... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
