| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                                              |
| Produktbeschreibung      | Human CD34 is high glycosylated type I transmembrane protein, and it could act as a scaffold for the attachment of lineage specific glycans, allowing stem cells to bind to lectins expressed by stromal cells or other marrow components. CD34 is found o...                      |
| Molekulargewicht         | 28.3 KDa                                                                                                                                                                                                                                                                           |
| NCBI                     | <a href="#">28906</a>                                                                                                                                                                                                                                                              |
| Reinheit                 | Greater than 95% as determined by reducing SDS-PAGE                                                                                                                                                                                                                                |
| Anwendungsbeschreibung   | Always centrifuge tubes before opening.Do not mix by vortex or pipetting.It is not recommended to reconstitute to a concentration less than 100µg/ml.Dissolve the lyophilized protein in distilled water.Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |
