| Spezies Reaktivität      | Mouse                                                                                                                                                                                                                                                                              |
| Produktbeschreibung      | CXCL16 is a single-pass type I membrane protein, which consists of 246 amino acids, CXCL16 induces a strong chemotatic response and calcium mobilization. CXCL16 acts as a scavenger receptor on macrophages, which specially binds to oxidized low densit...                      |
| Molekulargewicht         | 20.1 KDa                                                                                                                                                                                                                                                                           |
| NCBI                     | 8                                                                                                                                                                                                                                                                                  |
| Reinheit                 | Greater than 95% as determined by reducing SDS-PAGE                                                                                                                                                                                                                                |
| Anwendungsbeschreibung   | Always centrifuge tubes before opening.Do not mix by vortex or pipetting.It is not recommended to reconstitute to a concentration less than 100µg/ml.Dissolve the lyophilized protein in distilled water.Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |
