| Spezies Reaktivität      | Mouse                                                                                                                                                                                                                                                                              |
| Produktbeschreibung      | Fms-related tyrosine kinase 3 ligand(Flt3L) is a single-pass type I membrane protein and consists of 232 amino acids. Flt3L is a hematopoietic four helical bundle cytokine, structurally homologous to stem cell factor and colony stimulating factor. Fl...                      |
| Molekulargewicht         | 19.4 KDa                                                                                                                                                                                                                                                                           |
| NCBI                     | <a href="#">49772</a>                                                                                                                                                                                                                                                              |
| Reinheit                 | Greater than 95% as determined by reducing SDS-PAGE                                                                                                                                                                                                                                |
| Anwendungsbeschreibung   | Always centrifuge tubes before opening.Do not mix by vortex or pipetting.It is not recommended to reconstitute to a concentration less than 100µg/ml.Dissolve the lyophilized protein in distilled water.Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |
