| Hersteller               | MedchemExpress                                                                                                                                                                                                                                                |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | NAP-2/CXCL7 protein (LA-PF4) triggers DNA synthesis, mitosis, glycolysis, cAMP accumulation, and hyaluronic acid synthesis. It contributes to the formation of plasminogen activator in human synovial cells and acts as a CXCR1/CXCR2 ligand together wit... |
| Molekulargewicht         | Approximately 11 kDa, based on SDS-PAGE under reducing conditions.                                                                                                                                                                                            |
| Reinheit                 | 95                                                                                                                                                                                                                                                            |
| Formel                   | 5473(Gene_ID)P02775 (A59-D128)(Accession)                                                                                                                                                                                                                     |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
