| Produktbeschreibung      | The NXPH1 protein resembles a neuropeptide and may affect cell signaling by binding to alpha-neurotoxins and other potential receptors. Although the specific mechanisms and downstream effects remain unclear, the neuropeptide-like characteristics of N... |
| Molekulargewicht         | 45-58 kDa                                                                                                                                                                                                                                                     |
