| Produktbeschreibung      | The SULT2A1 protein utilizes PAPS for critical sulfonation of steroids and bile acids in the liver and adrenal glands. Its multifunctional activity extends to a variety of compounds, enhancing its water solubility to facilitate renal excretion. SULT2... |
| Molekulargewicht         | Approximately 34-38 kDa, based on SDS-PAGE under reducing conditions.                                                                                                                                                                                         |
| Reinheit                 | 98                                                                                                                                                                                                                                                            |
| Formel                   | 6822(Gene_ID)Q06520 (S2-E285)(Accession)                                                                                                                                                                                                                      |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
