| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | The ICAM-2/CD102 protein is a key player in cellular interactions, acting as a ligand for the leukocyte adhesion protein LFA-1. It inhibits LFA-1-dependent cell adhesion and contributes to lymphocyte recycling. ICAM-2/CD102 Protein, Mouse (HEK293) is... |
| Molekulargewicht         | Approximately 38-50 kDa due to the glycosylation.                                                                                                                                                                                                             |
| Reinheit                 | 97                                                                                                                                                                                                                                                            |
| Formel                   | 15896(Gene_ID)P35330 (S20-Q222)(Accession)                                                                                                                                                                                                                    |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
