| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | The CD146/MCAM protein is critical for maintaining endothelial monolayer integrity and cell adhesion in vascular tissue. Its expression promotes the interaction of melanoma cells with the vasculature and may contribute to tumor spread through the blo... |
| Molekulargewicht         | 80-110 kDa (glycosylation)                                                                                                                                                                                                                                    |
| Reinheit                 | 96.80                                                                                                                                                                                                                                                         |
| Formel                   | 4162(Gene_ID)P43121-1 (V24-G559)(Accession)                                                                                                                                                                                                                   |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
