| Hersteller               | MedchemExpress                                                                                                                                         |
| Wirt                     | Rabbit                                                                                                                                                 |
| Kategorie                | Biochemikalien                                                                                                                                         |
| Produktbeschreibung      | GAPDH Antibody is a non-conjugated and Rabbit originated IgG monoclonal antibody, targeting to GAPDH. It can be used as a loading control antibody.... |
| Molekulargewicht         | Predicted band size: 36 kDa, Observed band size: 36 kDa                                                                                                |
| Formel                   | 14433(Gene_ID)(Accession)                                                                                                                              |
| Target-Kategorie         | Apoptosis,Endogenous Metabolite                                                                                                                        |
| Antibody Type            | Recombinant Antibody                                                                                                                                   |
| Anwendungsbeschreibung   | MCE Product type: Antibodies                                                                                                                           |
