| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | HLA-G is a nonclassical major histocompatibility class Ib molecule that is critical for immune regulation at the maternal-fetal interface. It cooperates with B2M to form a complex that selectively binds self-peptides to promote maternal-fetal toleran... |
| Molekulargewicht         | Approximately 51-60 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                                                               |
| Formel                   | 3135&567(Gene_ID)P17693 (G25-T305)&P61769 (I21-M119)&RIIPRHLQL(Accession)                                                                                                                                                                                     |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
