| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | SARS-CoV-2 S1 Protein, in its Spike protein S1 form, initiates infection by attaching the virion to the cell membrane through host receptor interaction. Simultaneously, Spike protein S2 acts as a viral fusion peptide, revealing itself after S2 cleava... |
| Molekulargewicht         | Approximately 130-140 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                                                             |
| Formel                   | 43740568(Gene_ID)P0DTC2/QHD43416.1 (Q14-R683)(Accession)                                                                                                                                                                                                      |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
