| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                                |
| Produktbeschreibung      | Source : Escherichia Coli. Leptin Mouse Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 147 amino acids and having a molecular mass of 16.2 kDa.The Leptin is purified by proprietary chromatographic technique...   |
| Reinheit                 | Greater than 95.0% as determined by:(a) Analysis by SEC-HPLC.(b) Analysis by SDS-PAGE.                                                                                                                                                                          |
| Antibody Type            | Recombinant Antibody                                                                                                                                                                                                                                            |
| Application Verdünnung   | It is recommended to reconstitute the lyophilized Leptin in sterile 18MO-cm H2O not less than 100µg/ml, which can then be further diluted to other aqueous solutions. Biological activity of Mouse Leptin is performed in two different mouse obesity models, o |
