| Produktbeschreibung      | Source : Escherichia Coli. Oncostatin-M Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 227 amino acids and having a molecular mass of 26kDa. The OSM is purified by proprietary chromatographic technique...   |
| Reinheit                 | Greater than 95.0% as determined by(a) Analysis by RP-HPLC.(b) Analysis by SDS-PAGE.                                                                                                                                                                            |
| Application Verdünnung   | It is recommended to reconstitute the lyophilized Oncostatin M in sterile 18MO-cm H2O not less than 100µg/ml, which can then be further diluted to other aqueous solutions. The ED50 as determined by the dose-dependant stimulation of Human TF-1 cells is &lt |
