| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This assay employs an antibody specific for Anti-human TIMP-1 coated on a 96-well plate. Standards and samples are pipetted into the wells and TIMP-1 present in a sample is bound to the wells by the immobilized antibody. The wells are washed and biot... |
| Application Verdünnung   | This immunoassay kit allows for the in vitro quantitative determination of Human TIMP-1 concentrations in serum, plasma and other biological fluids. Detection Range: 31.2 - 2000 pg/ml<br>Sensitivity: < 18.75 pg/ml                                         |
