| Immunogen                | Full length recombinant Caspase-3 protein was used as the immunogen for this antibody.                                                                                                                                                                        |
| Produktbeschreibung      | Caspases are a member of the cysteine-aspartic acid protease family. Caspase-3 (31 kDa) is an executionary caspase which directly cleaves and activates poly(ADP-ribose) polymerase (PARP), sterol regulatory element binding proteins (SREBPs) or it can ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [ABM1C12]                                                                                                                                                                                                                                                     |
| NCBI                     | <a href="#">836</a>                                                                                                                                                                                                                                           |

|                        |                                                                                                                           |
