| Kategorie                | Antikörper                                                                                                                                                                                                                                                       |
| Applikation              | FACS                                                                                                                                                                                                                                                             |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                            |
| Immunogen                | Full length CD8a-alpha chain was used as the immunogen for this antibody.                                                                                                                                                                                        |
| Produktbeschreibung      | CD8 membrane glycoprotein that is expressed on cytotoxic T-cells where it interacts with MHC class I processed antigens. CD8 also regulates T-cell activation and differentiation. CD8 has two isoforms (25 and 21 kDa) CD8 can function either as a homodime... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                       |
| Klon-Bezeichnung         | [RPAT8]                                                                                                                                                                                                                                                          |
