| Immunogen                | Purified recombinant Mouse OX-40 antigen                                                                                                                                                                                                                      |
| Produktbeschreibung      | CD134 is a type I integral membrane protein. This receptor is expressed on activated CD4+and CD8+T cells and B cells. The CD134 binds to CD134 ligand (CD252) to provide a costimulatory signal that is independent of CD28. CD134 is involved in coordina... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [OX-86]                                                                                                                                                                                                                                                       |
