| Immunogen                | Human HSP70                                                                                                                                                                                                                                                   |
| Konjugation              | HRP                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | HSP70 genes encode abundant heat-inducible 70-kDa HSPs (HSP70s). In most eukaryotes HSP70 genes exist as part of a multigene family. They are found in most cellular compartments of eukaryotes including nuclei, mitochondria, chloroplasts, the endoplas... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [C92F3A-5]                                                                                                                                                                                                                                                    |

|                        |                                                                                                                            |
