| Immunogen                | HSP27 peptide                                                                                                                                                                                                                                                 |
| Konjugation              | PerCP                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | HSP25 is the mouse homologue of the human HSP27 protein, a member of the small heat shock protein family comprised of a diverse group of proteins from ~15 to >30kDa(1). The basic structure of most sHSPs is a homologous and highly conserved amino acid... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [8A7]                                                                                                                                                                                                                                                         |

|                        |                                                                                                          |
