| Immunogen                | Full length protein yeast HSP40 (YDJ1)                                                                                                                                                                                                                        |
| Konjugation              | ATTO-390                                                                                                                                                                                                                                                      |
| Produktbeschreibung      | Human HSP40/DnaJ proteins comprise a large protein family, members of which feature the J domain (named after the bacterial DnaJ protein). The J-domain spans the first 75 N-terminal amino acids and is separated from the C-terminal by a glycine/phenyl... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [1G10.H8]                                                                                                                                                                                                                                                     |
| NCBI                     | <a href="#">855661</a>                                                                                                                                                                                                                                        |

|                        |                                                                             |
