| Expression System        | HEK293 Cells                                                                                                                                                                                                                                             |
| Reinheit                 | > 95% as determined by reducing SDS-PAGE.                                                                                                                                                                                                                |
| Formulierung             | Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, pH 7.4. Normally 5%-8% trehalose, mannitol and 0.01% Tween 80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual. |
| Sequenz                  | Gln30-Trp248                                                                                                                                                                                                                                             |
