| Hersteller               | MyBiosource                                                                                                                                                                                                                                        |
| Wirt                     | Virus                                                                                                                                                                                                                                              |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                   |
| Reinheit                 | >90% as determined by SDS-PAGE                                                                                                                                                                                                                     |
| Formulierung             | Lyophilized from sterile 20mM Tris, 500mM NaCl, 10% glycerol, pH7.4. Normally 5%-8% trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Please refer to the specific buffer information in the hard copy of CoA. |
