| Alternativnummer         | MBS520042-5X0.5                                                                                                                                                                       |
| Hersteller               | MyBiosource                                                                                                                                                                           |
| Wirt                     | Mouse                                                                                                                                                                                 |
| Kategorie                | Antikörper                                                                                                                                                                            |
| Klonalität               | Monoclonal                                                                                                                                                                            |
| Klon-Bezeichnung         | [OX-42]                                                                                                                                                                               |
| Reinheit                 | Purified IgG buffered in PBS and 0.02% NaN <sub>3</sub> . (Purified from ascitic fluid via Protein G Chromatography). For maximum recovery of contents, spin down tube before use.    |
| Formulierung             | Biotin/FITC/PE/AF488/AF647/AF700 conjugated IgG buffered in PBS, 0.02% NaN <sub>3</sub> and EIA grade BSA as a stabilizing protein to bring total protein concentration to 4-5 mg/ml. |
