## Product Datasheet

**Synthetic Nanodisc Human epithelial Sodium Channel alpha Protein,  
Unconjugated  
ABC-A332628-10**

|                          |                                                                                                                                                                                                                                          |

| Alternativnummer         | ABC-A332628-10                                                                                                                                                                                                                           |
| Hersteller               | Antibodies.com                                                                                                                                                                                                                           |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                         |
| Konjugation              | Unconjugated                                                                                                                                                                                                                             |
| Produktbeschreibung      | Synthetic nanodiscs offer a stable and biologically relevant environment that closely mimics cell membranes and enables full-length transmembrane human epithelial Sodium Channel alpha protein to be purified and analysed in vitro.... |
| Konzentration            | Reconstitution dependent.                                                                                                                                                                                                                |
| Tag                      | C-terminal Flag Tag                                                                                                                                                                                                                      |
| Puffer                   | Lyophilized from 20 mM Tris-HCl, 150 mM NaCl, pH 8.0 with 5% - 8% Trehalose. Do not use solvents with pH lower than 6.5 in subsequent experiments.                                                                                       |
| Expression System        | HEK293 cells                                                                                                                                                                                                                             |
| Formulierung             | Lyophilized                                                                                                                                                                                                                              |
| Target-Kategorie         | epithelial Sodium Channel alpha                                                                                                                                                                                                          |
