| Wirt                     | E. coli                                                                                                                                                                                                                                                       |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Applikation              | SDS-PAGE, WB                                                                                                                                                                                                                                                  |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Konzentration            | Prior to lyophilization: 200 µg/ml                                                                                                                                                                                                                            |
| Molekulargewicht         | Calculated MW: 41.5 kDa Observed MW (SDS-PAGE): 50 kDa Possible reasons why the actual band size differs from the predicted band size: 1. Splice variants. Alternative splicing may create different sized proteins from the same gene. 2. Relative charge. T |
