| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                 |
| Immunogen                | Recombinant Human Mesothelin/MSLN Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Glu296-Gly580) of human Mesothelin (Accession NP_005814.2) fused with a Fc, 6*His tag at the C-terminus. |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                     |
| Produktbeschreibung      | Human Mesothelin/MSLN protein (Recombinant) (C-hFc&His)...                                                                                                                                                                                       |
