| Hersteller               | Nordic BioSite                                                                                                                                                                                                                          |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                        |
| Immunogen                | DNA sequence encoding the COVID-19 Spike S protein extracellular domain, [14-1211] accession QHD43416.1 including a C-terminal Fc AVI tag was expressed in HEK Cells. (The furin protease cleavage site was mutated at position 683) NA |
| Konjugation              | Unconjugated                                                                                                                                                                                                                            |
| Produktbeschreibung      | SARS COV2 Spike protein S protein (Recombinant) (Fc-Tag)...                                                                                                                                                                             |
| Tag                      | Fc Tag                                                                                                                                                                                                                                  |
| Reinheit                 | >95%, as determined by SDS-PAGE and HPLC NA                                                                                                                                                                                             |
