| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC-P                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Zebrafish                                                                                                                                                                                                                                                     |
| Immunogen                | An E.coli-derived zebrafish Hmgb1a/b recombinant protein (amino acids D123-K153) was used as the immunogen for the Zebrafish Hmgb1 antibody. This antibody will detect the a and b isoforms.                                                                  |
| Produktbeschreibung      | High mobility group box 1 protein, also known as high-mobility group protein 1 (HMG-1) and amphoterin, is a protein that in humans is encoded by the HMGB1 gene. This gene encodes a protein that belongs to the High Mobility Group-box superfamily. The ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| UniProt                  | <a href="#">Q6NX86</a>                                                                                                                                                                                                                                        |
| Puffer                   | Lyophilized from 1X PBS with 2% Trehalose                                                                                                                                                                                                                     |
| Reinheit                 | Antigen affinity chromatography                                                                                                                                                                                                                               |

|                        |                                                                                          |
|------------------------|------------------------------------------------------------------------------------------|
| Formulierung           | 0.5mg/ml if reconstituted with 0.2ml sterile DI water                                    |
| Antibody Type          | Primary Antibody                                                                         |
| Application Verdünnung | Immunohistochemistry (FFPE): 2-5 ug/ml                                                   |
| Anwendungsbeschreibung | Optimal dilution of the Zebrafish Hmgb1 antibody should be determined by the researcher. |
