| Artikelname              | InVivoPro Anti-Mouse PD-L1(B7-H1, CD274) in vivo antibody, Clone 10F.9G2, Clone: [10F.9G2], Rat, Monoclonal |
| Artikelnummer            | ASC-IV0101                                                                                                  |
| Hersteller Artikelnummer | IV0101                                                                                                      |
| Alternativnummer         | ASC-IV0101-100,ASC-IV0101-1,ASC-IV0101-25,ASC-IV0101-50,ASC-IV0101-5                                        |
| Hersteller               | Abbkine Scientific                                                                                          |
| Wirt                     | Rat                                                                                                         |
| Kategorie                | Antikörper                                                                                                  |
| Spezies Reaktivität      | Mouse                                                                                                       |
| Klonalität               | Monoclonal                                                                                                  |
| Konzentration            | Lot specific, generally 5.0 mg/ml                                                                           |
| Klon-Bezeichnung         | [10F.9G2]                                                                                                   |
| Puffer                   | PBS, pH 7.2, contains no stabilizers or preservatives                                                       |
| Reinheit                 | protein A or G, 99%                                                                                         |
| Target-Kategorie         | PD-L1                                                                                                       |

|                        |                                                                                                                                                                                                                                                                                                                                                           |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | Recommended Dosage: 200-500 µg per mouse, or 10 mg/kg. This range is based off the most recent publication data using the 10F.9G2 clone in vivo. Each investigator should determine their own optimal working dilution for specific applications. Application: In vivo PD-L1 blocked. Sterility: 0.2 µM filtered. Endotoxin: 1.0 EU/mg, by the LAL method |
