| Produktbeschreibung      | Luciferase from the firefly has become one of the more widely used reporter proteins for the study of gene expression. Luciferase catalyzes a bioluminescent reaction which requires the substrate luciferin as well as Mg <sup>2+</sup> and ATP. Mixing these reagent... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                                |
