| Hersteller               | Cusabio                                                                   |
| Kategorie                | Proteine/Peptide                                                          |
| Spezies Reaktivität      | Plant                                                                     |
| Tag                      | The tag type will be determined during production process.                |
| UniProt                  | <a href="#">P62926</a>                                                    |
| Puffer                   | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                               |
| Quelle                   | E.coli                                                                    |
| Reinheit                 | Greater than 85% as determined by SDS-PAGE.                               |
| Formulierung             | Lyophilized powder                                                        |
| Sequenz                  | ASCN GVCSPFEMPP CGTSACRCIP VGLVVGYCRN PSG                                 |

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | <p>We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.</p> |
