| Alternativnummer         | APE-P1618-5UG,APE-P1618-100UG,APE-P1618-500UG                                                                                                                                                 |
| Hersteller               | ApexBio                                                                                                                                                                                       |
| Kategorie                | Proteine/Peptide                                                                                                                                                                              |
| Molekulargewicht         | Approximately 13.2 kDa, a homodimeric protein consisting of two 59 amino acid chains, which includes a 40-amino acid trefoil motif containing three conserved intramolecular disulfide bonds. |
| Reinheit                 | > 97 % by SDS-PAGE and HPLC analyses.Endotoxin: Less than 1 EU/μg of rHuTFF3 as determined by LAL method.                                                                                     |
